Green Advantage, Inc., has notified Tim Snope, Vice President of Pre-Construction, and John Johnson, Estimator, that they successfully passed the Green Advantage Commercial Exam.

With the building industry changing and now engaging professionals in the growing sustainability movement, Tim and John's Green Advantage Certification in LEED technology will allow Burns to respond to the most important challenges of our time, including global climate change, dependence on non-sustainable and expensive energy sources, and threats to our health.

LEED-certified projects average substantial energy performance improvement over non-LEED buildings. Tim and John's LEED Professional Credentials give them strong depth of knowledge and practical understanding of the LEED program and its rating system.

Burns Mechanical is proud to be a driving force in the green building movement within Philadelphia region, and to support the U.S. Green Building Council's mission to achieve a sustainable built environment for everyone within a generation.
